SAJJAD AHMAD

AI Engineer

sajjaduop181@gmail.com +92 333 4874072 Islamabad, Pakistan

my-portfolio-mwyr.vercel.app

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building AI applications using Python, Machine Learning, and Large Language Models. Experienced in developing RAG systems, AI agents, and deep learning projects using modern AI frameworks. Strong interest in solving real-world problems through practical AI development, with a continuous focus on learning, improving, and building reliable solutions.

EXPERIENCE

AI Engineer Intern 06/2025 – 09/2025
Alright Tech

- Developed AI and Generative AI applications using Python, LangChain, LangGraph, and CrewAI.
- Built Retrieval-Augmented Generation (RAG) applications by integrating Large Language Models (LLMs) with vector databases.
- Designed and implemented Multi-Agent AI systems to automate complex workflows and improve task execution.
- Worked with Hugging Face and PyTorch to develop and evaluate machine learning and deep learning models.
- Collaborated with the development team to build, test, debug, and optimize AI solutions for production-ready applications.
- Researched and implemented modern AI techniques, including prompt engineering, LLM integration, and AI workflow automation.

EDUCATION

Bachelor of Science in Computer Science 2022 – 2026
University of Peshawar Peshawar, Pakistan

Intermediate in Computer Science 2020 – 2022
Karwan Model Colleges Kohat, Pakistan

TECHNICAL SKILLS

Programming Languages
Python

Generative AI & LLMs
LangChain, LangGraph Hugging Face Transformers, OpenAI API, Prompt Engineering, RAG

DataBase
Mongodb, Vectordb, Memorysaver

AI/ML Frameworks
TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, streamlit, FastAPI

Core Competencies
Machine Learning, Deep Learning, Neural Networks, NLP, Multi-Agent Systems, Data Analysis, Algorithm Design, Software Development, Problem Solving

PROJECTS

Multi-Agent University Assistant System
Developed an intelligent multi-agent AI system to automate academic support by resolving queries, managing schedules, and retrieving relevant resources. Leveraged LangChain, transformer-based NLP, and vector search to deliver faster, more accurate, and context-aware responses while improving the overall user experience.

AI Chatbot with Retrieval-Augmented Generation
Developed an intelligent conversational chatbot using Retrieval-Augmented Generation (RAG) to deliver accurate, context-aware responses from a domain-specific knowledge base. Integrated ChromaDB for semantic search and OpenAI GPT models with custom prompt engineering to improve retrieval quality and maintain context across multi-turn conversations.

Customer Churn Prediction
Developed a machine learning solution to predict customer churn using classification algorithms. Performed data preprocessing, feature engineering, model evaluation, and comparative analysis to identify the best-performing model while visualizing insights for data-driven decision-making.

Image Classification
Developed a deep learning model for image classification using Convolutional Neural Networks (CNNs). Applied image preprocessing, data augmentation, and TensorFlow/Keras to train, evaluate, and optimize the model for accurate image recognition.

AI Portfolio Website
Designed and developed a responsive portfolio website to showcase AI, Machine Learning, Deep Learning, and Generative AI projects. Built a modern UI with an integrated backend for contact management and resume downloads, emphasizing performance, clean architecture, and seamless deployment.
