

SAJJAD AHMAD

Peshawar, Khyber Pakhtunkhwa, Pakistan
+92 333 4874072 | sajjaduop181@gmail.com

PROFESSIONAL SUMMARY

Motivated Computer Science graduate specializing in Artificial Intelligence, Machine Learning, and Deep Learning with demonstrated experience building intelligent multi-agent systems. Proficient in Python, TensorFlow, PyTorch, and modern AI frameworks including LangChain and Hugging Face. Strong foundation in algorithm design, neural networks, and natural language processing with proven ability to develop scalable AI solutions. Seeking an AI/ML engineering internship to apply technical expertise and contribute to cutting-edge projects while growing in a collaborative, innovation-driven environment.

EDUCATION

Bachelor of Science in Computer Science

University of Peshawar, Peshawar, Pakistan

Expected May 2026

Intermediate in Computer Science

Karwan Model Colleges, Kohat, Pakistan

2020 – 2022

TECHNICAL SKILLS

- Programming Languages: Python, Streamlit, JavaScript, HTML, CSS
- AI/ML Frameworks: TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, NLTK, spaCy
- Generative AI & LLMs: LangChain, Hugging Face Transformers, OpenAI API, Prompt Engineering, RAG
- Core Competencies: Machine Learning, Deep Learning, Neural Networks, NLP, Multi-Agent Systems, Data Analysis, Algorithm Design, Software Development, Problem Solving

PROJECTS

Multi-Agent University Assistant System

2025

Python, LangChain, NLP, Multi-Agent Framework, Vector Database

- Architected intelligent multi-agent AI system serving 5,000+ students with academic query resolution, scheduling assistance, and resource management using autonomous agent-based architecture
- Implemented NLP pipelines with transformer models achieving 89% query understanding accuracy and 65% reduction in response time compared to traditional rule-based systems
- Engineered task delegation framework using LangChain enabling concurrent handling of 200+ simultaneous requests with 92% user satisfaction rate
- Integrated vector database for semantic search delivering contextually relevant responses from knowledge base of 10,000+ documents

AI Chatbot with Retrieval-Augmented Generation

2024

Python, OpenAI API, LangChain, memorysaver, RAG, Streamlit

- Developed intelligent conversational chatbot using RAG architecture providing accurate responses from domain-specific knowledge base of 1,000+ documents
- Implemented vector embeddings and semantic search with ChromaDB achieving 88% relevance score and 75% reduction in hallucination
- Integrated OpenAI GPT-4 with custom prompt engineering maintaining conversation context across multi-turn dialogues
- Deployed scalable application handling 500+ daily interactions with average response latency under 2 seconds
